High CBD Aromatherapy

Infuse or Diffuse

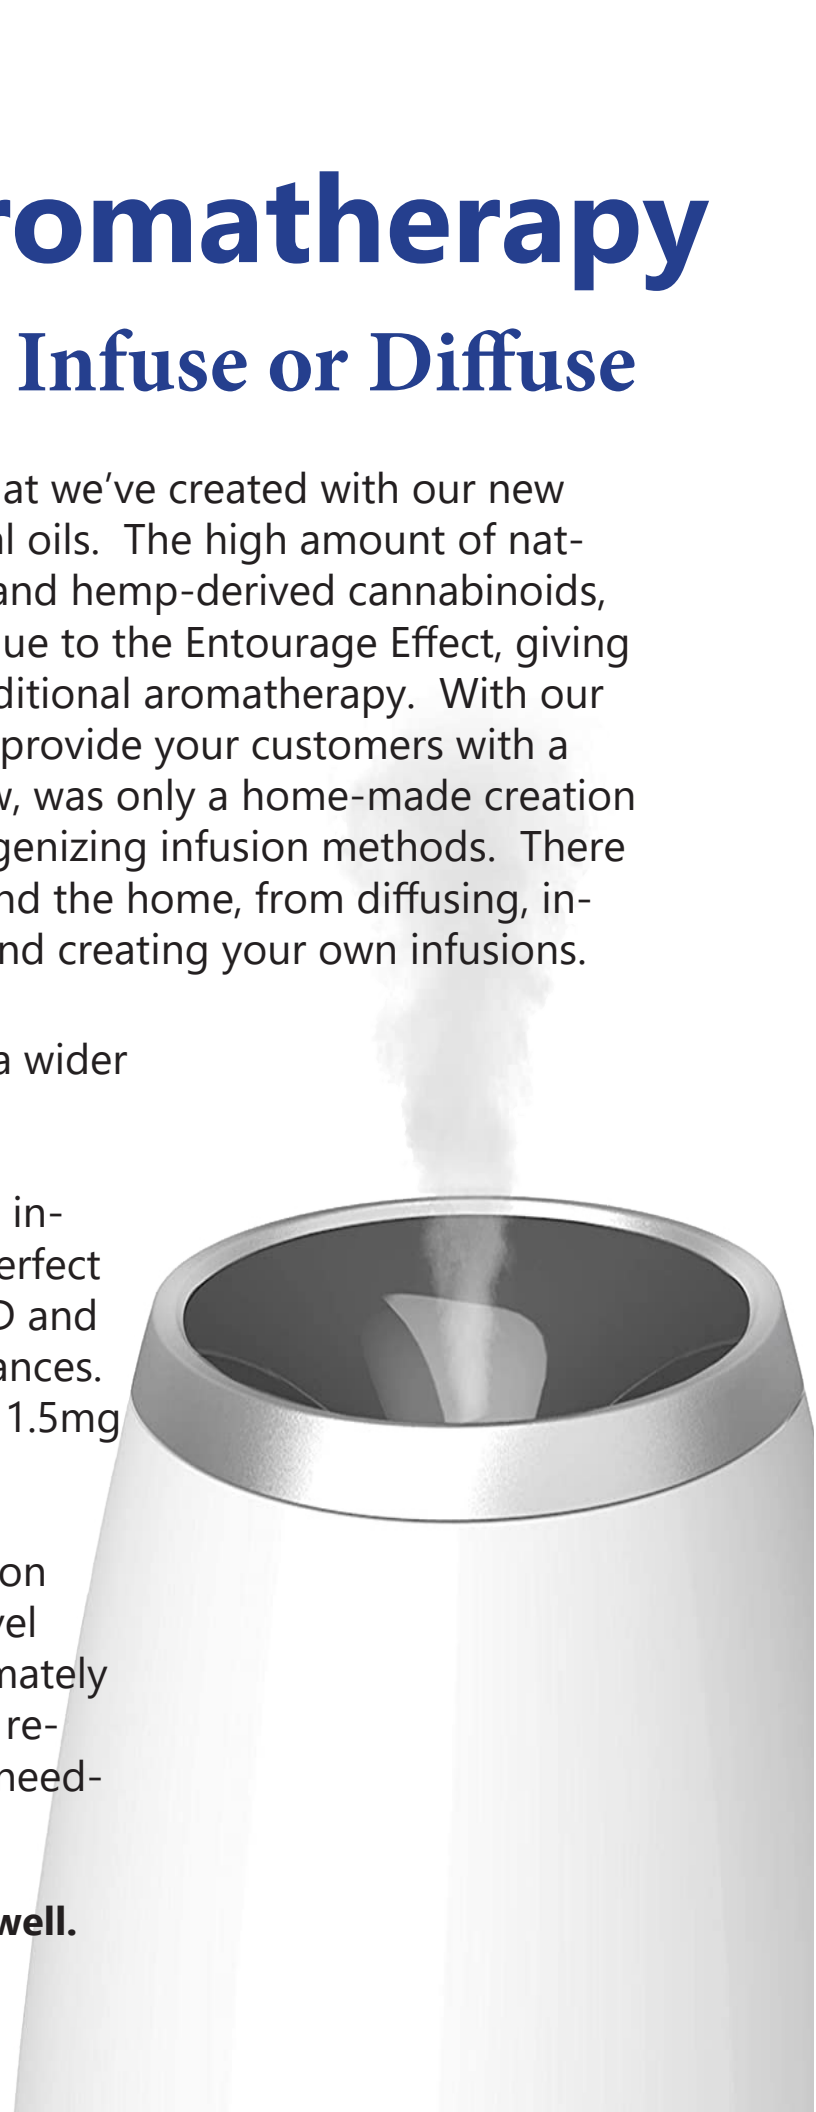

A higher level of therapy is just what we've created with our new line of hemp-derived CBD essential oils. The high amount of natural terpenes within essential oils and hemp-derived cannabinoids, naturally compliment each other due to the Entourage Effect, giving the user a greater benefit than traditional aromatherapy. With our growing essential oil line, you can provide your customers with a new experience, one that until now, was only a home-made creation without precise dosing and homogenizing infusion methods. There are literally hundreds of uses around the home, from diffusing, infusing into commercial products and creating your own infusions.

Every oil comes in 2 strengths for a wider variety of uses.

Our 97/3 line is a 3% CBD solution infused with 450mg of CBD and is perfect for those new to cannabis and CBD and for those with sensitive or low tolerances. Each drop contains approximately 1.5mg of CBD.

Our 90/10 line is a 10% CBD solution with 1500mg of CBD for higher level uses. Each drop contains approximately 5mg of CBD and allows users who require higher doses to achieve the needed ratios.

Custom formulations available as well.

Lavender (*Lavendula Angustifolia*)

Lavender has a calming, floral aroma that can facilitate a calming atmosphere and promote more restful sleep. When used topically, adds a pleasing, mild scent and a variety of benefits from managing pain and inflammation to reducing blemishes and acne.

High CBD Aromatherapy Candles

100MG of CBD Per Ounce of Wax

1000mg in each 10oz candle

1600mg in each 16oz candle

Designed to look great in any room of the home, our frosted High CBD Tumblers have a custom stained wood lid and 100mg of CBD per ounce of candle wax. Broad Essentials candles offer a much higher level of therapy due to the higher CBD content than our competitor's candles which typically contain about 100mg per candle. With only 100mg in the entire candle, when burned over a 20-50 hour period, only 1-2 milligrams of CBD are available per hour of burning. Ours offer between 25mg and 35mg per hour, depending upon conditions when the candle is being used allowing for a greater uptake of CBD and increased benefits.

Lavender Dreams

Lavender Dreams CBD Candles are perfect for creating calming and restful evenings and promoting faster, deeper sleep. Comes with custom stained wood lid.
